

**IDENTIFICATION CARD PRINTER AND RIBBON
CARTRIDGE**

ABSTRACT OF THE DISCLOSURE

5 An identification card printer includes a
card input, a card transport, a printhead, and a card
output. The card transport is configured to feed a
card from the card input along a print path. The
printhead is positioned below the print path and is
10 configured to print an image on a surface of the
card. The card can then be discharged through the
card output.
